

Hiring: Technical Trainer – Linux System Administration (RHEL 9)

Xavric Solutions is hiring a Technical Trainer to deliver our course 'Linux System Administration Essentials with Red Hat (RHEL 9)' — covering core Linux operations, system administration, security, networking, and RHCSA-level skills.

Role Overview

Deliver offline training on:

- Linux fundamentals, terminal usage & RHEL environment
- Bash commands, file system navigation & text processing
- File management, permissions, ownership & SELinux basics
- User & group administration, password policies & security
- Service management (systemctl), daemons & process monitoring
- SSH configuration, key-based authentication & secure access
- Networking configuration (static/DHCP), connectivity testing
- Software installation using yum/dnf & repository configuration
- Storage management: partitions, mounting, fsck & file systems
- System logs, troubleshooting, system monitoring & cockpit
- RHCSA-focused practice labs & enterprise-style server deployment

Requirements

- Experience: 0 – 5 years (Freshers welcome)
- College professors & IT professionals can apply as part-time
- Strong fundamentals in Linux CLI, file systems, permissions & networking
- Familiarity with Red Hat / CentOS / Ubuntu distributions
- Ability to deliver hands-on labs and real troubleshooting examples
- Good communication skills and interest in training RHCSA-level learners

Location & Mode

- Location: Bhopal
- Mode: Offline (in-center)
